

GARY BURGER

IT MANAGER

Gary Burger received his IT certification from Chubb Institute in the Fall of 1999, graduating second in his class and participating in the Honors program. Mr. Burger joined the IT Department at Medina Consultants in February 2000 and provides IT management and administration. Previously, Mr. Burger was Owner/Operator and/or Manager at various companies.

Since joining Medina Consultants, Mr. Burger has developed a strong Microsoft network with a centralized data system connecting Medina's six offices across four states. Focusing on system redundancy and data security, each office has solid interconnectivity providing a productive working environment. Support has been extended to every user's desktop with technical assistance available to each individual user.

Mr. Burger believes in a proactive approach to problem resolution with the goal being to head off problems before they become critical. This is accomplished by listening carefully to the grass roots people that accomplish the work and bringing their needs and recommended solutions to the attention of upper management.
