

Building on Solid Expertise

# JOSEPH MESSINA, PLS, PP

VICE PRESIDENT, DIRECTOR OF SURVEY

Joseph Messina, PLS is Vice President / Director of Survey for Medina Consultants. He has over 20 years of diverse land surveying experience and his knowledge of boundary surveying, geodetic control networks and topographic mapping has been integral in the successful development of projects for a multitude of clients. Mr. Messina is responsible for oversight of surveying activities at all of Medina's offices. His unique background in surveying coupled with his general engineering background enables Mr. Messina to understand the needs and objectives of his clients. He is involved with a client from proposal preparation to project execution.

Mr. Messina's strengths in geodetic control development are fundamental building blocks in the engineering community allowing him to provide accurate, comprehensive and detailed reporting to his clients. His advancements and knowledge of the latest high definition survey / laser scanning technology provides clients with a new three dimensional mapping tool to aid in project completion with minimal intrusions and MPT protection services for both roadway and rail operation. Mr. Messina pursues continuing education, which gives him better understanding of the latest technological tools of the trade and provides clients with the most effective and superior work quality deliverable.

Mr. Messina has completed projects for a variety of clients ranging from local. County, State and Federal Agencies, including the PANY&NJ, NJ Transit, NJDOT, NYSDOT, NYCDOT, Metropolitan Transit Authority, Long Island Railroad, Amtrak, Delaware River Joint Toll Bridge Commission, Conrail, NY Susquehanna & Western Railroad, as well as the Counties of Morris, Warren and Passaic. His vast experience with rail and highway transportation projects has provided essential insight for the execution of projects such as the East Side Access Rail Yard, Second Avenue Subway and the Number 7 Line Subway Extension. Mr. Messina also served as QA/QC Manager for 10 years on the recently completed Secaucus Transfer project.

Medina has received three prestigious awards since 2004 for its use of both innovative and conventional surveying technologies, including the ACEC-NY 2005 Diamond Award for the Second Avenue Subway Project in Manhattan, NYC; the ACEC-NY 2004 Gold Award for the WTC Ground Zero project in NYC; and the ACEC-NJ 2004 Distinguished Award for the Route 30/130 Collingswood Circle Elimination Project in Collingswood, NJ.
